SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification according to regulation (EC) 1272/2008:

Classification under the CHIP	F: R11; Xi: R36; N R50/53; -: R66; -: R67
Classification under CLP	Aquatic Acute 1: H400; Aquatic Chronic 1: H410; Eye Irrit. 2: H319; Flam. Liq. 1: H224; STOT SE 3: H336
Most important adverse effects	Highly flammable. Irritating to eyes. Causes serious eye irritation. May cause an allergic reaction. Very toxic to aquatic organisms, may cause longterm adverse effects in the aquatic environment. Repeated exposure may cause skin dryness or cracking. Vapours may cause drowsiness and dizziness.
Ingredients of unknown toxicity	Percentage of the mixture consisting of ingredient(s) of unknown toxicity: 9.5%

SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measures

Skin contact	<p>Wash skin thoroughly with soap and water or use recognised skin cleanser.</p> <p>Remove contaminated clothing and shoes.</p> <p>Wash contaminated clothing thoroughly with water before removing it, or wear gloves.</p> <p>Continue to rinse for at least 10 minutes.</p> <p>Get medical attention.</p> <p>In the event of any complaints or symptoms, avoid further exposure.</p> <p>Wash clothing before reuse.</p> <p>Clean shoes thoroughly before reuse.</p>
Eye Contact	<p>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids.</p> <p>Check for and remove any contact lenses.</p> <p>Continue to rinse for at least 10 minutes.</p> <p>Get medical attention..</p>
Inhalation	<p>Remove victim to fresh air and keep at rest in a position comfortable for breathing.</p> <p>If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus.</p> <p>If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.</p> <p>It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.</p> <p>Get medical attention.</p> <p>If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.</p> <p>Loosen tight clothing such as a collar, tie, belt or waistband.</p>

NAILPERFECTTM

PROFESSIONAL SYSTEMS

<p>Ingestion</p>	<p>Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.</p>
<p>Protection of first-aiders</p>	<p>No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.</p>

4.2. Most important symptoms and effects, both acute and delayed

<p>Skin contact</p>	<p>There may be irritation and redness at the site of contact.</p>
<p>Eye Contact</p>	<p>There may be irritation and redness. The eyes may water profusely.</p>
<p>Ingestion</p>	<p>There may be soreness and redness of the mouth and throat.</p>
<p>Inhalation</p>	<p>There may be irritation of the throat with a feeling of tightness in the chest. Exposure may cause coughing or wheezing.</p>
<p>Delayed/ Immediate Effects</p>	<p>Immediate effects can be expected after short-term exposure.</p>

NAILPERFECTTM

PROFESSIONAL SYSTEMS

4.3. Indication of any immediate medical attention and special treatment needed

Immediate special treatment	Eye bathing equipment should be available on the premises.
-----------------------------	--

4.4. Most important symptoms and effects, both acute and delayed

Skin contact	Adverse symptoms may include the following: irritation, redness, dryness, cracking
Eye Contact	There may be irritation and redness. The eyes may water profusely.
Ingestion	There may be soreness and redness of the mouth and throat.
Inhalation	There may be irritation of the throat with a feeling of tightness in the chest. Adverse symptoms may include the following: nausea or vomiting headache drowsiness/fatigue dizziness/vertigo
Delayed/ Immediate Effects	Immediate effects can be expected after short-term exposure.

4.5. Indication of any immediate medical attention and special treatment needed

Notes to physician Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

SECTION 5: FIRE-Fighting MEASURES

5.1 Extinguishing Media

Extinguishing Media	Use dry chemical, CO ₂ , water spray (fog) or foam. Do not use water jet.
---------------------	---

5.2. Special hazards arising from the substance or mixture

Exposure hazards	In combustion emits toxic fumes.
Hazards from the substance or mixture	Highly flammable liquid. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard.

NAILPERFECTTM

P R O F E S S I O N A L S Y S T E M S

Hazardous thermal decomposition products	Decomposition products may include the following materials: carbon dioxide carbon monoxide
---	--

5.3 Advice for fire-fighters

Advice for fire-fighters	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
Special protective equipment for fire-fighters	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions	Refer to section 8 of SDS for personal protection details. If outside do not approach from downwind. If outside keep bystanders upwind and away from danger point. Mark out the contaminated area with signs and prevent access to unauthorised personnel. Turn leaking containers leak-side up to prevent the escape of liquid.
For non-emergency personnel	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Shut off all ignition sources.

NAILPERFECTTM

PROFESSIONAL SYSTEMS

<p>For non-emergency personnel</p>	<p>No flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.</p>
<p>For emergency responders</p>	<p>If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also Section 8 for additional information on hygiene measures.</p>

6.2. Environmental precautions

<p>Environmental precautions</p>	<p>Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Do not discharge into waterways such as drains, lakes, rivers, ocean. Contain the spillage using bunding.</p>
---	---

6.3. Methods and material for containment and cleaning up

<p>Small spill</p>	<p>Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.</p>
<p>Large spill</p>	<p>Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas.</p>

NAILPERFECTTM

PROFESSIONAL SYSTEMS

<p>Large spill cont.</p>	<p>Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with noncombustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product.</p>
---------------------------------	---

6.4. Reference to other sections

<p>Reference to other sections</p>	<p>See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information.</p>
---	--

SECTION 7: HANDLING AND STORAGE

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

7.1 Precautions for safe handling

<p>Handling requirements</p>	<p>Avoid direct contact with the substance. Ensure there is sufficient ventilation of the area. Do not handle in a confined space. Avoid the formation or spread of mists in the air.</p>
<p>Protective measures</p>	<p>Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate.</p>

NAILPERFECTTM

PROFESSIONAL SYSTEMS

<p>Protective measures cont.</p>	<p>Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use non-sparking tools. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container.</p>
<p>Advice on general occupational hygiene</p>	<p>Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.</p>

7.2. Conditions for safe storage, including any incompatibilities

<p>Storage conditions: Temperature</p>	<p>Store between the following temperatures: 13 to 27°C (55.4 to 80.6°F).</p>
<p>Storage conditions: Exposure</p>	<p>Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink.</p>
<p>Storage conditions: Dangerous reaction</p>	<p>Eliminate all ignition sources. Separate from oxidizing materials.</p>
<p>Storage conditions: Packaging and Labeling</p>	<p>Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers.</p>
<p>Storage conditions: Regulations</p>	<p>Store in accordance with local regulations.</p>

8.2. Exposure controls

Engineering measures	<p>Ensure there is sufficient ventilation of the area. The floor of the storage room must be impermeable to prevent the escape of liquids.</p> 
Respiratory protection	<p>Self-contained breathing apparatus must be available in case of emergency. ALWAYS use protective mask.</p> 
Hand protection	<p>ALWAYS use protective gloves.</p> 
Eye protection	<p>ALWAYS use safety glasses. Ensure eye bath is to hand.</p> 
Protection of face	<p>Use Protective maks</p> 
General Theft Protection	<p>Keep the products locked up when not in use to prevent theft. Keep out of reach of children.</p>

EXPLANATORY DESCRIPTION

General Hygiene Measures	<p>Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period.</p> <p>Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace.</p> <p>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.</p>
Hand protection	<p>Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.</p> <p>Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties.</p> <p>It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers.</p> <p>In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.</p>
Body protection	<p>Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.</p> <p>When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.</p> <p>Refer to European Standard EN 1149 for further information on material and design requirements and test methods.</p>

NAILPERFECTTM

PROFESSIONAL SYSTEMS

Other skin protection	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Eye/face protection	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.
Respiratory protection	Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SECTION 13: DISPOSAL CONSIDERATIONS

13.1. Waste treatment methods

Disposal operations	<p>The generation of waste should be avoided or minimised wherever possible.</p> <p>Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.</p> <p>Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor.</p> <p>Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.</p>
Hazardous waste	<p>The classification of the product may meet the criteria for a hazardous waste.</p>
Hazardous waste	<p>The generation of waste should be avoided or minimised wherever possible.</p> <p>Wastepackaging should be recycled.</p> <p>Incineration or landfill should only be considered when recycling is not feasible.</p>
Special precautions	<p>This material and its container must be disposed of in a safe way.</p> <p>Care should be taken when handling emptied containers that have not been cleaned or rinsed out.</p> <p>Empty containers or liners may retain some product residues.</p> <p>Vapor from product residues may create a highly flammable or explosive atmosphere inside the container.</p> <p>Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally.</p> <p>Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.</p>

COMMON WARNINGS WHICH MAY OR MAY NOT BE USED IN THIS MSDS SHEET: See section 2 and 3 which are applicable to this product.

H220:	Extremely flammable gas
H225:	Highly flammable liquid and vapour
H226:	Flammable liquid and vapour
H241:	Heating may cause a fire or explosion
H242:	Heating may cause a fire
H302:	Harmful if swallowed.
H312:	Harmful in contact with skin or if inhaled
H313:	May be harmful in contact with skin
H314	Causes severe skin burns and eye damage
H315:	Causes skin irritation.
H316:	Causes mild skin irritation
H317:	May cause an allergic skin reaction.
H318:	Causes serious eye damage.
H319:	Causes serious eye irritation.
H330	Fatal if inhaled
H332:	Harmful if inhaled
H334:	May cause allergy or asthma symptoms or breathing difficulties if inhaled
H335:	May cause respiratory irritation.
H336:	May cause respiratory irritation
H340:	May cause genetic defects (state route of exposure if it is conclusively proven that no other routes of exposure cause the hazard)
H341:	Suspected of causing genetic defects (state route of exposure if it is conclusively proven that no other routes of exposure cause the hazard)
H350:	May cause cancer (state route of exposure if it is conclusively proven that no other routes of exposure cause the hazard)
H351:	Suspected of causing cancer (state route of exposure if it is conclusively proven that no other routes of exposure cause the hazard)
H361f:	Suspected of damaging fertility.
H370:	Causes damage to organs (or state all organs affected, if known) (state route of exposure if it is conclusively proven that no other routes of exposure cause the hazard)
