Section 2: Hazards Identification

EMERGENCY OVERVIEW

This information is based on findings from related or similar materials.

• May be slightly toxic.

• May cause moderate skin injury (reddening & swelling).

May cause chemical burn in eye

Potential Health Effects, Signs and Symptoms of Exposure:

Hazard Symbol: Xi

| Primary Route of Entry | No specific information available. |
|------------------------------|--|
| Eye | Contains materials that are essentially nonirritating, but contact may cause slight transient irritation. |
| | Material may act as a Lachrymator (a substance which increases the flow of tears). |
| Skin | Contains materials that may cause moderate skin injury (reddening and swelling) and/or sensitization. |
| | Prolonged contact may cause blister formation (burns). Since irritation may not occur immediately, contact can go unnoticed. |
| Ingestion | May cause gastrointestinal irritation with nausea, vomiting and diarrhea. |
| Inhalation | May cause respiratory tract irritation with presence of monomer. Vapors may cause dizziness or suffocation. |
| NOTE: Refer to Section II. T | oxicological Information for Details |

Hydroxypropyl Methacrylate:

 Section 4: First Aid Measures

 First Aid for Eye
 Flush with plenty of water for 15 minutes, occasionally lifting the upper and lower eyelids. Get medical aid. Do NOT allow victim to rub or keep eyes closed.

 First Aid for Skin
 Remove contaminated clothing and wash contact area with soap and water for 15 minutes. Get medical aid if symptoms persist. Wash clothing before reuse.

 First Aid for Inhalation
 In case of exposure to a high concentration of vapor or mist, remove person to fresh air. If breathing has stopped, administer

 First Aid for Ingestion
 Never give anything by mouth to an unconscious person. Get medical aid. Do NOT induce vomiting. If conscious and alert, rinse mouth and drink 2 to 4 cupfuls of milk or water.

Section 5: Fire Fighting Measures

EU Regulations require the consultation of ter spray to disperse the vapors, to protect personnel attempting to | | |
| Section 7: Handling and | d Storage | | | |
| Handling: | Ground and bond containers when transferring material. Avoid contact with skin and eyes, and clothing. Use with adequate ventilation and avoid breathing in vapor. Keep container closed when not in use. Avoid contact with heat, sparks and flame. Remove all contaminated clothing, shoes, belts and other leather goods immediately. Incinerate leather goods (including shoes). Wash contaminated clothing thoroughly before reuse. Wash skin thoroughly with soap and water after handling. Solvents should not be used to clean skin because of increased penetration potential. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose empty containers to heat, sparks, or open flames. Material is extremely light sensitive . Use extreme care and do not expose to natural or UV light, unless using material for it's intended use. Since the material is very photosensitive any type of light may initiate the curing process. | | | |
| Storage: | Product is extremely light sensitive. If exposed to natural light, LED, UVA, UVB or UV any light, material will cure very quickly. Store in a cool, dry place, away from heat and all types of light. Store at temperatures below 100°F/38°C but above the product's freezing point. If no freezing point is given, keep above 32°F/0°C at all times. | | | |
| Explosion Hazard: | High temperatures and fire conditions may cause rapid and uncontrolled polymerization which can result in explosions and the violent rupture of storage vessels or containers. | | | |
| Section 8: Exposure Co | ontrols / Personal Protection | | | |
| Engineering Controls | Local exhaust recommended to control exposure which may generating vapors. | y result from operations generating aerosols and hot operations | | |
| Personal Protective Equipme | ent | | | |
| General: | To identify additional Personal Protective Equipment (PPE) requirements, it is recommended that a hazard assessment in accordance with the OSHA PPE Standard (29CFR1910.132), or European Standard En166 be conducted before using this product. Provide eye stations and safety showers. Wear impervious clothing to prevent ANY contact with this product, such as gloves, apron, boots, or whole body suit. Nitrile rubber is better than PVC. | | | |
| Eye / Face Protection: | Wear safety glasses. Wear coverall chemical splash goggle to splashing or spraying material. | es and face shield when possibility exists for eye and face contact due | | |
| Skin Protection: | Use impermeable clothing to prevent ANY contact with this rubber is better than PVC. | product, such as gloves, apron, boots, or whole body suit. Nitrile | | |
| Respiratory Protection: Section 9: Physical and | A NIOSH/MSHA approved air purifying respirator with an organic vapor cartridge or canister may be permissible under certain limited circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by nuisance level organic vapor dust masks can be used, however the use of the respirator is limited. Follow OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN149. | | | |

To the best of our knowledge, the ecotoxocological and chemical fate properties have not been thoroughly investigated.

Do not allow to enter drinking water supplies, wastewater, or soil.

Section 13: Disposal Considerations

Dispose of diking materials and absorbent in compliance with State, Local, and Federal regulations. Residual vapors may explode on ignition; do not cut, drill, or weld on on or near the container. Mix with compatible chemical which is less flammable and incinerate. Whatever cannot be saved for recovery or recycling should be handled as hazardous waste and sent to a RCRA approved waste facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements. For EU Member State, please refer to any relevant Community provisions relating to waste. In their absence, it is useful to remind the user that national or regional provisions may be in force.

Section 16: Other Information

EU Classes and Risk / Safety Phrases for Referenced Ingredients (See Section 2):

Hazard Symbols:

Xi - Irritants

Risk Phrases:

R36/37/38 Irritating to eyes, respiratory system and skin; R43 May cause sensitization by skin contact

Safety Phrases:

S2 Keep out of the reach of children;

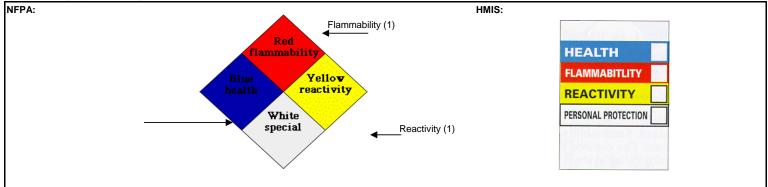

S26:In case of contact with eyes, rinse immediately with plenty of water and seek medical advice

S37 Wear suitable gloves

S62 If swallowed, do not induce vomiting: seek medical advice immediately and show this container or label.

S28:After contact with skin, wash immediately with plenty of water.
